Does South Africa allow heritable human genome editing?

The research ethics guidelines were updated in May, but the news became more widely known last month. Currently, no country explicitly allows heritable human genome editing in clinical settings. It is not clear to what extent South Africa's scientific community was consulted on the changes.

Who funded stem cell research in South Africa?

This work was funded by the South African Medical Research Council (Extramural Unit for Stem Cell Research and Therapy) and the University of Pretoria through the Institute for Cellular and Molecular Medicine. CLH, MA and MSP all contributed equally to the concept, preparation and editing of the paper. Correspondence to Michael Sean Pepper.

Is cell therapy a viable treatment option in South Africa?

Cell therapy in South Africa is presently limited to HSCT; however, even this treatment modality has significant challenges, one of the most important being lack of suitable donors, particularly for patients of African and mixed-race ancestry.

Are CAR T-cells a problem in South Africa?

This problem is of course not unique to South Africa. Two Indian biotech companies are developing CAR T-cells at a goal price reduction of nearly tenfold compared to current prices. The intended model is to decentralise the service and make use of local manufacturing and engineering expertise.

Higee New Energy's 314Ah energy storage cells maintain compatibility with the mainstream 280Ah cells in terms of size, enhancing system integration adaptability across all application domains of the 280Ah cells. The same-sized 314Ah cells offer a 12% increase in capacity, effectively reducing the overall integration costs of energy storage systems.

ABout CELL CULTURE. Cell culture is the process by which cells are grown under controlled conditions, generally outside their natural environment. After the cells of interest have been isolated from living tissue, they can subsequently be ...

Stem cells or progenitor cells are found throughout the human body and act as an inherent repair system for various organ systems, replenishing adult tissues daily. ... It was the obvious next step to incorporate stem cells into their treatment regime back in South Africa, and the South African Stem Cell Institute was born.
