

How much does a battery cost in Spain?

Spain has historically had a wholesale price floor at 0 EUR/MWh. This is now being modified to -500 EUR/MWh in line with other European markets (announced Dec 20). Although very low prices have not been prevalent in Spain to date, this should help battery returns as renewable penetration increases at pace across this decade.

Will Spain switch to electric vehicles?

Spain's Minister of Industry Jordi Hereu applauded the announcement, which he said received public funding from Europe's post-pandemic recovery plan that includes Spain's ambitious plan to shift to electric vehicles. "We all have a lot riding on the transition toward an electric transport model," Hereu told reporters.

Are China's battery manufacturers catching up?

CATL and other Chinese battery makers are far ahead in the critical area of producing batteries for electric vehicles. Northvolt, Europe's great hope for catching up, filed for bankruptcy last month.
