Spain's total wind generation capacity, its prime renewable source in recent years, has doubled since 2008. Solar energy capacity, meanwhile, has increased by a factor of eight over the same period.

The Hassan Foundation. Clean Energy. The clean energy division of the company recognises the long term future of global energy and covers wind and hydroelectricity turbine technology and solar cell systems with complete end to end services from project management (including procurement) feasibility assessments, design and planning, project ...

In the past decade, Spain's energy dependency has been relatively stable between 70 percent and 75 percent. In 2022, with the hydropower production at low levels due to droughts, Spain increased its energy imports (mostly oil and gas--the highest consumption in the last decade) to 2019 levels at 74 percent.

Energy Advisory Leader | MENA | WSP in the Middle East · Hassan is an experienced energy professional with 14 years of experience in public and private sector advisory for power & utility corporations, energy regulators, and industrial clients. It includes work experience across the MENA region, United Kingdom, Europe, and the United States. Before joining WSP, ...

3 ???· Spain is set to charge to the forefront of Europe's renewable energy revolution with the announcement of Conso II, the largest hydroelectric energy storage facility ever planned on the continent. Backed by Spanish energy ...
