

Who is sphere energy?

Equipment & Engineering | Testing Service | Data & Insights | Battery Strategy Consulting Sphere Energy is an emerging battery tech and advisory firm. What sets us apart is our passionate team of battery experts who are committed to tackling the most demanding challenges along the battery value chain by utilizing the latest technologies to excel.

How will Senegal's power sector be strengthened?

Senegal's power sector would be strengthened by continued diversified investment in power, including renewables and natural gas, while phasing out heavy fuel oil. Senegal Energy Outlook - Analysis and findings. An article by the International Energy Agency.

Will Senegal's economy grow six-times bigger in the AC?

Senegal's economy could grow six-times larger in the AC while limiting growth in energy demand to three-times its current level by utilising new gas resources and boosting the use of renewables in power. In the AC, gas meets a growing share of energy demand while traditional use of biomass starts to decline in rural areas. IEA. Licence: CC BY 4.0

Should Senegal develop a natural gas strategy?

The development of natural gas strategies that cover the entire value chain, including end-uses (gas-to-power or gas-to-industry), would help Senegal to maximise the benefits of its natural gas.

Is biomass a source of electricity in Senegal?

Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important source in lower-income settings. Senegal: How much of the country's electricity comes from nuclear power? Nuclear power - alongside renewables - is a low-carbon source of electricity.

How will electrification affect Senegal's economy?

Senegal's stock of two/three-wheelers is set to grow strongly in both scenarios and its electrification would help to free oil for other productive uses. In the AC, cement production could more than double to 2040, although the availability of fuels, including domestic gas, will be critical for this and for wider future industrial development.
