

What is the Zanotti Energy Group partnership with xiber energy solutions?

The agreement signed on 25 July 2023 in Milan provides for the Zanotti Energy Group to operate in continuity on the market with its own services, intensifying its partnership with XIBER Energy Solutions and thus jointly pursuing an ambitious development plan to realise turnkey solutions using the most advanced decarbonisation technologies.

What are Sri Lanka's energy policies & strategies?

Sri Lanka's energy policies and strategies strongly focus on developing conventional and nonconventional renewable energy sources for generating power. Promoting domestic energy resources has become one of the main policy components in Sri Lanka.

Is Sri Lanka a viable alternative energy source?

Moreover, Sri Lanka has also identified the potential for wind, bioenergy, and solar as alternative energy sources in the past two decades. However, the current contribution from these three renewable sources in comparison to hydroelectricity remains significantly low.

Are Sri Lanka's renewable research activities being burdened by a lack of accurate data?

Sri Lanka's overall renewable research activities are being burdened by the lack of accurate and contemporary data, especially in line with renewable energy generation and utilization.

What can Sri Lanka do with excess wind energy?

Other applications to Sri Lanka are in the early discussion stages which include the ability to work on green hydrogen technology using excess wind to move from an energy deficit to a surplus situation (Fernando et al., 2023). Wind energy has the potential to be harnessed and transformed into hydrogen using an electrolyzer.

Does Sri Lanka have solar energy?

Furthermore, Sri Lanka has also seen an increase in the energy generated through bioenergy sources (geothermal, biomass and waste energy) with this segment producing approximately 250 GWh of energy by 2020. However, despite its potential, solar energy has had an uninspiring growth until 2016.

Sri Lanka is currently facing an acute energy crisis, primarily due to the country's reliance on imported fossil fuel. The solution to this is for the country to move on to more renewable sources of energy such as wind, solar, bio-gas, biomass and hydro power. Renewable energy also presents a host of other benefits both [...]
