

Sudan solar land lease companies

What does it mean to lease your land for solar?

Leasing your land for solar means allowing a solar company or developer, like OYA Renewables, to design, permit, construct, and operate a solar energy system on your property in exchange for payment or compensation, typically for a set period (e.g. 25 years).

Do landowners get paid for a solar project?

The landowner typically receives annual lease payments or in some cases, may even sell a portion of their land for the solar project. The lease payments become a source of passive income for the landowner and help increase the use of clean energy.

How long does a solar farm lease last?

The lease requires the landowner to dedicate a portion of their land to solar for a set period, typically 20-25 years. During the operational period of the solar farm, the use of that portion of the land is limited and may require permission from the solar company.

Make sure the contract includes provisions that determine who is responsible for decommissioning the solar array. This will ensure that if your lease expires and is not renewed, the company goes out of business or sells the project, or the solar array is no longer viable, the system will be dismantled, and the land returned to its pre-lease condition.
