

Sustainable power solutions Montserrat

Who provided the power data for the solar PV project in Montserrat?

The power data was kindly provided by the Government of Montserrat. Figure 16: Placard for the 250kW solar PV project in Montserrat. Renewable Energy planning in Montserrat

Can wind energy be implemented in Montserrat?

Although wind energy has not yet been fully re-explored in Montserrat, a desktop study using RE-SAT wind resource maps was conducted to determine suitable locations for the implementation of wind energy. The outcome of this study was included in their first Environmental Statistics Compendium in Montserrat, which was published in 2020.

Why should Montserrat invest in re-sat projects?

The RE-SAT projects has provided the Government of Montserrat with a new renewable energy platform that has been used to support their transition to renewables and a climate resilient future. Montserrat has a vision of achieving 100% renewable energy grid penetration by 2030.

Who created the Energy Task Force in Montserrat?

An Energy Task Force was created in Montserrat, which included the Energy Unit of MCWEL, the Program Management Office in Montserrat, MUL and a Blue Economy consultant, that was charged with the creation of an alternative IRP.

How much does electricity cost in Montserrat?

Montserrat's utility rates start at \$0.53 per kilowatt-hour (kWh) for residential customers, which is above the Caribbean regional average of \$0.33/kWh. Like many island nations, Montserrat is almost entirely dependent on imported fossil fuels, leaving it vulnerable to global oil price fluctuations that directly impact the cost of electricity.

What are the challenges faced by Montserrat's re-sat project?

In-country challenges: o Timing and relevance are important for co-production: The RE-SAT project was well received by Montserrat due to their ambitions to transition to renewables as they saw an immediate opportunity to exploit the platform to their advantage. (Montserrat Energy Policy 2016-2030).

We answer this calling by developing tailor-made and sustainable power solutions for our clients - helping them generate cleaner energy and use it more efficiently. Renewable Power ...
