

The Turkish army and its mercenary allies from the Syrian National Army destroyed the electricity infrastructure in northern and eastern Syria, including distribution stations, and occupying others such as Mabrouka power station, and cut off water to the Euphrates Dam.

Under the new law, the Syrian Minister of Electricity may grant licenses for investors to implement conventional electricity generation projects. Investors are not obligated to purchase electricity from Syria's state power utility. At the time, the law was seen as legalizing the work of private generator networks.

Syria's power grid has been decimated by years of war, leaving millions with unreliable energy. The Union of Medical Care and Relief Organisations (UOSSM) has begun a project to install solar panels on hospitals to ensure that ...
