Will Syria reshape the balance of power in the Middle East?

The Syrian government has been toppled, and its leader sent into exile, a seismic shift poised to reshape the balance of power in the Middle East. Rebels seized the capital Damascus over the weekend, having captured Homs and other smaller cities in a lightning-fast offensive that took the incumbent government by storm.

Why is Syria reliant on Iran?

Syria's 13-year civil war crippled the country's energy sector, making it highly reliant on imports from Iran. Below are facts about Syria's energy sector. **Syria has not exported oil since late 2011, when international sanctions came into force, and has become dependent on fuel imports from Iran to keep power supplies running.

How will Syria's fall impact key players in the Middle East?

For Russia, Syria's fall could mean losing its closest Middle Eastern ally and undermining its ability to project power while it fights a war in Ukraine. For Iran, it could shatter its so-called Axis of Resistance, comprising allied states and militias. Here's how the events in Syria could impact key players in the Middle East:

Product Quality - We are in-house OPGW manufacturer and our dark fibres come with over 25 years of life expectancy. The aluminium/ steel sheath provides high mechanical and thermal protection to the fibre.

In the 2000s, Syria's electric power system struggled to meet the growing demands presented by an increasingly energy-hungry society. Demand grew by roughly 7.5% per year during this decade, fueled by the expansion of Syria's industrial and service sectors, the spread of energy-intensive home appliances, and state policies (i.e. high subsidies and low tariffs) that encouraged wasteful energy practices. Syria's inefficient transmission infrastructure compounded these probl...
