

Equatorial Guinea is seeking foreign investment to make the nation a trade hub for gas in the region, including with Cameroon and Nigeria. The Gas Mega Hub initiative set down by the government looks to develop and expand onshore processing infrastructure, with additional hubs throughout the region to offtake gas from stranded reserves on the ...

The Ceiba field and Okume complex are located in the Gulf of Guinea, in water depths ranging from 50m to 800m. Trident is the operator of the Block G producing-fields, while Kosmos operates the surrounding exploration acreage: ...

On the back of industry and fiscal reform, Equatorial Guinea is officially open for business and investment, said the country's Minister of Mines and Hydrocarbons, Antonio Oburu Ondo.

In Equatorial Guinea, we have been marketing products and services since 1984 through our network of service stations and to our business customers. We lead several community outreach initiatives in the country.

Energy in Equatorial Guinea is an industry with plenty of potential, especially in the fields of oil and natural gas. However, production has been declining in recent years due to under-investment and lack of new discoveries. In 2022, the country produced less than 100,000 barrels of oil per day (bopd) according to OPEC [1] data.

developing areas. Energy self-sufficiency has been defined as total primary energy production divided by total primary energy supply. Energy trade includes all commodities in Chapter 27 of the Harmonised System (HS). Capacity utilisation is calculated as annual generation divided by year-end capacity x 8,760h/year. Avoided

Energy, Resources, Utilities Transition to the zero state. Realizing a net zero vision takes much more than cutting emissions. To create a cleaner and greener future, energy, resources, and utility businesses will have to recraft their operating models and adopt an ecosystem approach.
