

Does the Gambia have solar energy resources?

The Gambia has significant solar energy resources which can be deployed via solar PV plants, which have become price competitive with thermal plants and attractive for advancing national renewable energy and greenhouse gas (GHG) reduction targets. IRENA (2018) has estimated national solar potential at 428 MW.

Is RE a solution to energy problems in the Gambia?

Policy makers across Africa have been among the last to embrace RE as a solution to their energy problems. They are often locked into crisis management on a day-to-day basis. The country's policy makers need to be persuaded that RE has a real future in the energy mix of The Gambia. They need to demonstrate this by their actions.

Why should the Gambia invest in solar energy?

To match the rising demand and to provide sustainable and accessible energy to all Gambians, the potential for solar energy investment is immense in The Gambia. The government of The Gambia seeks to increase RE's contribution to 40% from 2% presently in the coming years.

Does the Gambia have a wind-related energy project?

There is limited experience in wind-related energy projects in The Gambia. Much of the early work was restricted to village water pumping projects. In the 1990s, the Department of Water Resources (DWR) actively promoted the use of wind pumps along coastal villages with support from the EU.

What will the Gambia's future energy strategy look like?

This should form part of The Gambia's future energy strategy. High transmission and distribution losses (over 30% in The Gambia) worsen the energy security problem. They also deepen suppressed demand. Those with the ability to pay will turn to on-site generators. All these have economic, social and environmental costs.

How will interconnected power infrastructure affect rural energy services in the Gambia?

The effect of a highly interconnected power infrastructure on rural energy services in The Gambia is uncertain, as most people will continue to rely on decentralised systems.

In The Gambia, the lack of reliable, affordable power seriously hampers investment. But renewable energy technologies - whose cost has fallen rapidly in recent years - are more cost-effective than existing fossil-fuel power ...

Your dream, Our commitment. The vision bearer Okoye, Bonny Chukwurah established Chybon C& TSC (Commercial and Technical Service Company), now Chybonsolar Energy, in The Gambia in the year 2000, and expanded into Nigeria in 2008. Ybonsolar Energy Limited is a leading renewable energy company | operating in Nigeria & The Gambia,...
