

Our broad and deep experience in the instrument transformer field, especially for non-conventional instrument transformers, allows Greenwood Power to bring the best sensors, with the best features, at the lowest costs, to the global marketplace.

Greenwood-Power was founded in 2017 and is specialized in designing and developing non-conventional instrument transformers for the medium voltage grid. Products are dedicated to a variety of applications, like gas insulated switchgear, air insulated switchgear, and outdoor installations, which have high resistance to harsh environmental ...

Greenwood-Power develops and trades in high precision current and voltage sensors for medium voltage grids. Production takes place at the company's own manufacturing sites in Austria and Hungary. The products are installed in the ring main units of the grid.

Greenwood-Power is specialized in designing and developing non-conventional instrument transformers for the medium voltage grid. Products are dedicated to a variety of applications, like gas insulated switchgear, air insulated switchgear, and outdoor installations, which have high resistance to harsh environmental conditions.

Leading innovator for non-conventional transformers Greenwood-Power was founded in 2017. With concentrated expertise, the entire team is able to develop non-conventional current- and voltage sensors that revolutionize the market.
