

The Netherlands is accelerating the transition to sustainable energy, offering opportunities for global innovators in smart energy solutions: The Dutch government is targeting almost 100% sustainable energy by 2050; The ...

PowerPulse is helping anyone that wants to play a more active role in the energy system. Through our long-term power modelling, we guide policy makers and power producers in the complex energy market so they can test the ...

PowerPulse is helping anyone that wants to play a more active role in the energy system. Through our long-term power modelling, we guide policy makers and power producers in the complex energy market so they can test the robustness of their decisions in a range of regulatory and market scenarios.

The aim of MISD is to develop a new modular, sustainable and secure-by-design concept to be deployed in places close to end users (edge computing). The guiding principle is to achieve a significant reduction in total ...

Creating smart grid solutions in the Netherlands that can be scalable worldwide. The energy transition, the fast pace of electrification and the increasingly distributed production and feed-in of power, are posing steep challenges to the energy system in the Netherlands and in the rest of the world.

The aim of MISD is to develop a new modular, sustainable and secure-by-design concept to be deployed in places close to end users (edge computing). The guiding principle is to achieve a significant reduction in total energy consumption, from cooling to computing power and data flows.

The Netherlands is accelerating the transition to sustainable energy, offering opportunities for global innovators in smart energy solutions: The Dutch government is targeting almost 100% sustainable energy by 2050; The Netherlands is pioneering green hydrogen, battery and smart-grid energy technologies

In order to meet your corporate climate goals and consumers' increasing expectations about sustainability, PowerPulse guides you through the setup and implementation of your corporate climate strategy by researching potential short- and long-term power consumption optimizations in the broadest sense.

In order to meet your corporate climate goals and consumers' increasing expectations about sustainability, PowerPulse guides you through the setup and implementation of your corporate climate strategy by researching potential ...

Creating smart grid solutions in the Netherlands that can be scalable worldwide. The energy transition, the fast

The Netherlands power pulse solutions

pace of electrification and the increasingly distributed production and feed-in of power, are posing steep ...

By phasing out the current net metering system and funding solar and storage projects, the Dutch government is helping to create a more reliable and fair energy system for the future, as well as...
