

# The photovoltaic panel is broken Who should I ask to replace the battery

Should I repair or replace my solar panel?

A skilled technician will assess the problem and let you know the cost of repair vs. replacement. Micro-cracks or issues with components or wiring can normally be fixed by a solar panel technician. However, broken or severely cracked panels may need to be replaced.

How to fix a broken solar panel?

The first step is to identify the broken solar panel. Once you have found the broken solar panel, you will need to remove it from the system. To do this, you will need to disconnect the power from the solar panel and then remove the screws that are holding it in place. Once the solar panel is removed, you can now proceed to the next step.

What causes a broken solar panel?

The most common cause of a broken solar panel is cracked glass. If the glass on your solar panel is cracked, you will need to replace it. You can purchase a replacement solar panel online or at a local hardware store. Once you have replaced the broken solar panel, you can now proceed to the next step.

How do I choose a solar panel repair company?

Ideally, you'll choose a solar panel repair company that can help to service and repair your solar panel system for many years to come. Help get that selection right first time by checking out online reviews from previous customers. For such an important investment in your home, this simple action will provide the reassurance you need.

Do I need a professional technician to repair my solar panels?

Whatever your solar panels have suffered, you will need qualified professional expert technicians to carry out any necessary repairs. We can ensure that your investment in energy efficiency and economy can operate at peak running capacity to provide the benefits that you are entitled to receive.

What should I do if my solar panels are damaged?

Regularly inspect your solar panels for damage. Keep tree and bush branches away from your solar panels. Doing so may mean pruning trees and bushes or removing them if they become too large. Regularly clean your panels or have a professional service perform the task. Have regular professional whole-system inspections.
