

Top power station Myanmar

How will Myanmar's new hydropower station work?

The new hydropower station in Myanmar is a run-of-river type, which involves no resettlement, little land inundation, and environmental impact. It has an installed capacity of 600 MW, with an actual power supply of 174.8 MW and an annual power output of 4,033 GWh. The electricity will be transmitted to both Myanmar and China through 230 kV and 220 kV cables.

How much electricity does Myanmar get from power stations?

Under all the joint-venture agreements, Myanmar is entitled to get 10 to 15 percent of the annual electricity generation from the power stations free of charge.

Who owns Sino-Myanmar power station?

The Sino-Myanmar power station is owned by the Yunnan company, which holds 80pc of the joint-venture. The company will be fully in charge of the project construction, operation, and management for 40 years after its completion, and then transfer it to the Myanmar government.

When will Myanmar's power plant upgrade be completed?

In 2020, the Myanmar government approved plans to replace the existing power generation infrastructure at this power station with a 300 MW combined-cycle system. The upgrade was expected to be completed by 2022, but has been delayed, with construction yet to start.

Is MEPE building a power station in Myanmar?

MEPE is expected to begin work soon on building a 33-MW power station in Myanmar. The project will have one gas-powered turbine and another that uses steam. Most of the project funding is to be provided by the Japanese government.

In 2020, the Myanmar government approved plans to replace the existing power generation infrastructure at this power station with a 300 MW combined-cycle system. The upgrade was expected to be completed by 2022, but has been delayed, with construction yet to start.

It is also the largest new energy power generation project cluster in Myanmar. With an installed capacity of 160 megawatts, the PV project cluster is capable of generating 342 million kilowatt-hours of power annually, which can meet domestic demand of 1 ...
