

U S Virgin Islands low voltage cabinet

In 2017, Hurricanes Irma and Maria caused widespread destruction in the United States Virgin Islands. In particular, the electric power grid was severely damaged, resulting in extensive power outages across all islands of the territory. Exacerbating the outages were the fundamental problems of outdated electrical

This upgrade, scheduled for completion in August 2023, will significantly improve the territory's power capacity and efficiency, delivering approximately 30 percent more efficiency than WAPA's older generators. The project is fully funded by a grant from the U.S. Department of Housing and Urban Development.

U.S.VIRGIN ISLANDS - After years of diligent efforts and strategic negotiations with HUD, White House officials, and congressional leaders, Governor Albert Bryan Jr. proudly announces the approval of \$100 million in funding from the ...

When the electric power system in the U.S. Virgin Islands is rebuilt, it will be stronger than it has ever been. The Virgin Islands Water and Power Authority, with help from the Federal ...

Working with the University of the Virgin Islands, Sandia National Labs, and the Virgin Islands Water and Power Authority (VIWAPA), Wille was able to measure the benefit of installing composite poles and underground power lines that ...

When the electric power system in the U.S. Virgin Islands is rebuilt, it will be stronger than it has ever been. The Virgin Islands Water and Power Authority, with help from the Federal Emergency Management Agency, plans to harden the power grid so it can withstand hurricanes with 200-mile-per-hour winds.

US VIRGIN ISLANDS - Governor Albert Bryan Jr. was joined for a major announcement Wednesday at Government House on St. Croix by VI Office of Disaster Recovery Director (ODR) Adrienne L. Williams-Octalien, WAPA Board Chair Kyle Fleming and WAPA Chief Administrative Officer Don Gregoire.
