

United Kingdom enspec power ltd

At a time when the UK is playing a leading role in the global drive to achieve Net Zero, Enspec is responding to the challenge with a full consultancy and facilitation service for large energy users to improve productivity and sustainability.

We operate heavily within the renewables market, assisting power plants with power system study requirements needed for Grid Connection Agreements and mitigating solutions when needed.

Enspec is an electrical and power engineering firm that was founded 30 years ago in the UK, which has some of the world's strictest power quality regulations. Since then, we have evolved into a leading provider of power quality ...

Two decades on, we're still a friendly bunch and one of the UK's leading independent specialists in power quality engineering. We really understand electrical power systems and are passionate about what we do and what's happening in the wider world of technology.

Enspec is an electrical and power engineering firm that was founded 30 years ago in the UK, which has some of the world's strictest power quality regulations. Since then, we have evolved into a leading provider of power quality consultancy, studies, and solutions to major partners across the globe.
