

Uruguay solar full roof

What is solar full roof?

Embrace the synergy of style and sustainability with Solar Full Roof, a 2in1 integrated solar roof. Seamlessly integrating advanced solar technology into the architecture of your home, this solution transcends conventional rooftop installations.

How long does a solar full roof take to install?

Experience premium solar roofing without the premium price. Blending with dummy modules ensures a uniformly sleek look. On average, a Solar Full Roof can be installed within 2 days. Compared to traditional rooftop solar panel solutions, Solarstone's 2-in-1 solar roof acts as roofing material itself, resulting in a modern and uniform-looking roof.

How to choose a solar full roof?

The Solar Full Roof is suitable for sloped roofs with a minimum pitch of 18 degrees to ensure water-tightness. For the underlayment, choose one that can withstand temperatures up to 120°C as a safety measure.

Can a solar full roof fit a sloped roof?

Absolutely, if your roof is sloped with a minimum pitch of 18 degrees. The Solar Full Roof is designed to integrate seamlessly with various architectural styles. Whether you're looking for a complete solar roof or a blend of solar panels with your existing roofing material, our system can be tailored to fit.
