So far, the solar cells have been mostly produced by companies with industrial printing capacity. This is where 3D printing becoming more universally available gets exciting. Because of the developments in solar cell printing, a large industrial printer can create rolls of solar cells that can be shipped and delivered to your home like a yoga mat.

How much do solar panels cost on average? Most people will need to spend between \$16,500 and \$25,000 for solar panels, with the national average solar installation costing about \$21,816.. Most of the time, you'll see solar system costs listed as the cost per watt of solar installed so you can easily compare prices between quotes for different system sizes.
