

ANSYS is specialized in engineering software and provides simulation solutions. Now with the support of ANSYS software solutions, WattsUp Power will be capable of increasing the level of advanced calculations to study the vibrations and stability and to ...

WattsUp Power's fast-responding, durable flywheels are the perfect solution for these high-cycle, high-power applications because they can instantly balance this short-term intermittency, to help restore local or grid-wide power quality. And ...

WattsUp Power's fast-responding, durable flywheels are the perfect solution for these high-cycle, high-power applications because they can instantly balance this short-term intermittency, to help restore local or grid-wide power quality. And the high-cycle design life means low costs over time.

Advanced power electronics and a motor/generator convert that kinetic energy to electric energy, making it instantly available when needed. Our systems are modular and can be configured to meet the power capacity demands of a variety of applications, from 100 kW to multi-MW systems.

WattsUp Power's fast-responding, durable flywheels are the perfect solution for these high-cycle, high-power applications because they can instantly balance this short-term intermittency, to ...

The potential of completely new and ground-breaking technology has meant that Molslinjen has just bought into the Hvidovre company Wattsup Power A/S. The company produces so-called flywheels, which in ...

The potential of completely new and ground-breaking technology has meant that Molslinjen has just bought into the Hvidovre company Wattsup Power A/S. The company produces so-called flywheels, which in theory can run a fast ferry entirely on green energy.

WattsUp Power A/S (WUP) is a game changer in energy storage, the company is a privately held, with a huge growth potential. WUP's energy storage flywheel, has advanced power electronics and a motor/generator that convert kinetic energy to electric energy, making it ...

WattsUp Power A/S Wattsup Power offers a cutting edge energy storage solution, based on flywheel technology. Flywheel technology is the only high density and low loss energy storage system in the world today with a 100% green footprint.
