Are solar panels too expensive?

Read more: Find out how much solar panels cost. We've worked with the Royal Institute of Chartered Surveyors and surveyed more than 1,000 solar panel owners to give you costs by system size, house type and electricity production. Whether you feel that solar panels are 'too expensive' also depends on what you get in return.

How much do solar panels cost?

The price of a typical 3.5 kilowatt-peak PV solar panel system is about £7,000. Based on the Energy Saving Trust's figures, it could take someone living in the middle of the country, in a typical home, anywhere between 12 and 17 years to recoup the costs of installing panels, based on current Energy Price Cap rates.

How much does a solar panel cost in the UK?

The average cost of a solar panel system for a typical three-bedroom house in the UK is £9,600, including a battery. Solar panels can save you up to £1,014 annually, totalling nearly £30,000 of savings over their lifespan. Adding a solar battery can boost your energy savings by up to 90 per cent.
