

What to do if the solar generator is broken

What should I do if my solar meter is faulty?

Contact your solar panel installer or a solar panel maintenance professional. If your generation meter is replaced, make sure you get a letter from the installer stating what they have done and that they changed the meter because it was faulty. The paperwork should also state the model and serial numbers of the old and new meters.

What should I do if my solar inverter fails?

If you've installed solar, here's what to do if your solar inverter fails. It is uncommon for solar equipment to fail, but it's important to know what to do and where to turn if it does. If your solar inverter fails, your solar installation company is the best resource to turn to.

What should I do if my solar panels don't work?

Checking for shade on your panels - trees and shrubs that grow and block the sun from your panels will affect the amount of electricity they produce. So it's good practice to prune them back. Keeping an eye out for birds or squirrels nesting under your panels. They can cause damage, as well as soiling your panels.

Can a faulty solar generation meter be repaired?

Solar generation meter replacements are a relatively inexpensive and common repair but sometimes what appears to be a faulty generation meter can be an indication of faulty or damaged wiring elsewhere. If in doubt, book an engineer to carry out a fault finding visit.

Can a cracked solar panel still be generating electricity?

The cracked panel may still be generating electricity but Ben Robinson, director of Exeo Energy, advises getting it replaced as soon as possible: "This will eventually result in issues, normally as soon as moisture enters the panel". See if you can get a replacement panel under warranty. If so, Mr Robinson advises that:

How do I know if my solar inverter is failing?

Also check your inverter for any fault codes or error messages. Check the real-time and cumulative generation on your inverter (most have these options) to make sure that the solar panels are still generating electricity. If the system is generating at the inverter this implies a failed generation meter.
