

The xelectrix Power Box is a plug and play power storage system that can be easily integrated into existing electrical networks with or without solar or wind power systems. It uses intrinsically safe LiFePO₄ battery cells and has a ...

The xelectrix Power Box is an energy storage system which has been designed for use in off-grid environments, such as construction sites, as well as for commercially or industrially used facilities. The ergonomic device offers several possible applications.

The xelectrix Power Box is a plug and play power storage system that can be easily integrated into existing electrical networks with or without solar or wind power systems. It uses intrinsically safe LiFePO₄ battery cells and has a unique bi-directional hybrid inverter.

In-house designed interface technology allowing the Power Box to charge and discharge using only one inverter while offering features like Reactive Power Compensation, Unbalanced Load Acceptance and Peak Power Boosting with PARALLEL PLATFORM TECHNOLOGY INSIDE.

Après des années de recherche intensive sur le contrôle des batteries et de la puissance, la gamme xelectrix Power Box débarque ! Conçu en Autriche, le produit est un système multifonctionnel et modulaire qui utilise notre technologie de plateforme parallèle et notre concept unique d'onduleur.
