Tunisia has signed a memorandum of understanding with French company TotalEnergies and Austrian group Verbund to produce green hydrogen (H2V). The first phase of the project, which is expected to cost EUR6 billion (\$6.5 billion), aims to produce 200,000 tonnes of H2V per year, generating 5,000 megawatts (MW) of renewable energy and 2,000MW of ...

The new project will fund efforts by Tunisia's national electricity and gas company (Société

Tunisienne de l'Electricite et du Gaz - STEG) to strengthen the country's electricity transmission system, integrate domestically produced renewable energy, and improve the commercial performance of the utility.

The Government of Tunisia (GoT) has embarked on an ambitious path to increase its renewable energy production. Through the TERI UMBRELLA, the World Bank has been providing technical assistance activities to support and accelerate Tunisia's energy transition, particularly to increase renewable energy generation.

In June 2023, the World Bank approved US\$268.4 million in financing for the Tunisia-Italy interconnector (ELMED) project that will link energy grids between Tunisia and European markets, with the eventual aim for Tunisia to export excess renewable energy.

XTG Green Energy is a Poland-based company. It operates in the mobile devices, home appliances, and beauty industries, offering a wide range of products and attractive offers for users. Siedziba główna Ul. Rakietowa 37

The projects are expected to reduce Tunisia's exposure to gas price volatility and exchange rate fluctuations, easing the fiscal burden on the government and helping to preserve its foreign reserves while helping meet Tunisia's growing energy demand.

The new project will fund efforts by Tunisia's national electricity and gas company (Société Tunisienne de l'Electricite et du Gaz - STEG) to strengthen the country's ...
