SOLAR PRO.

Zimbabwe dyness energy storage system

Dyness" first high security, high energy density DC1000V liquid cooling all-in-one energy storage system, compact structure design reduces space, 232kWh in a single cabinet, supports AC and DC side expansion at any time, zero parallel capacity loss.

In the field of household storage, Dyness has independently developed the most advanced BMS battery management and module management DC/DC system. The system enables module-level management, improves safety, extends battery life, and reduces operating costs for household products.

Dyness Home Energy Storage Solution: All-round Robustness with Premium Flexibility and Innovation PowerBrick: Cost-effective Residential Energy Storage Solution Brings More Power Stability and Productivity

Dyness is a global research, development and manufacturing company of solar energy storage battery systems, providing high voltage, low voltage and other intelligent energy storage lithium battery systems for residential, commercial and industrial customers.

Dyness provides customers with full-cycle high-yield intelligent energy storage solutions, industrial and commercial energy storage solutions, residential PV energy storage solutions, centralised energy storage plant solutions, microgrid energy storage solutions, industrial park energy storage solutions, and so on.
